Bug Report

Bug Number: 001

Bug Title: Inaccurate Score Tally

Priority: Critical

Platform/Environment: Windows PC, Chrome Browser

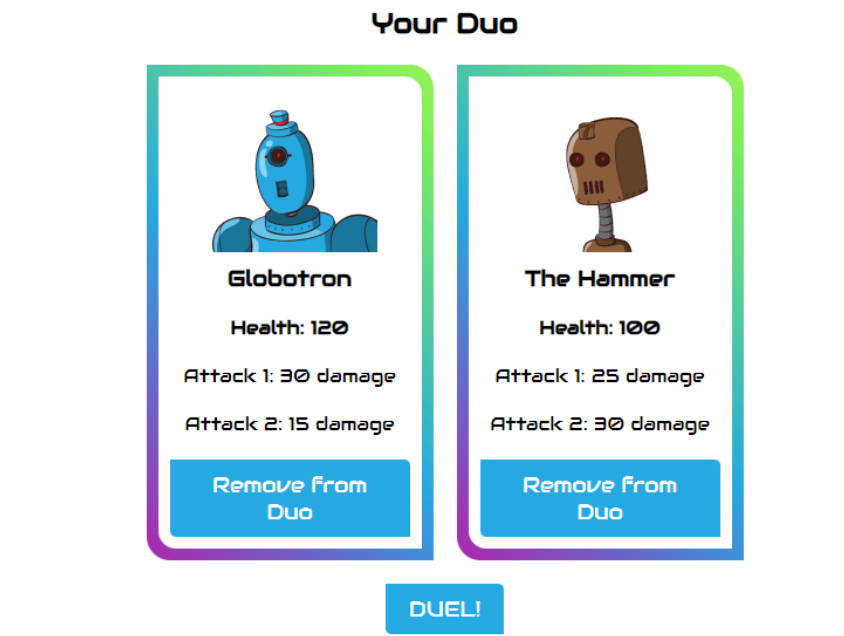

Description: A problem occurred after winning a round of Duel Duo. A win would be tallied as a loss instead of a win.

Steps to Reproduce:

- Choose bots for duo with great chances of winning
- Click “Duel!” button
- Check for result of the duel
- Check for a tally of the result in the appropriate bucket

Expected and Actual Result: User should receive a tally in the wins if the duel was won and a tally in the losses if the duel was lost. The actual result was that both wins and losses were tallied in the losses.
